Why select/choose www.totherescue.com ?

NEW QUESTION: 1

You are working on a project to develop an authentication system for an e-commerce website. This system provides two features: Registration and authentication. Two different development teams develop these two features.

There is a high likelihood that the delivery of the authentication feature to the test team will be three weeks later. To complete the registration the user must provide the following registration inputs: Name, surname, birth date, fiscal code and he/she can select a username and a password.

A registered user can be a special user or a normal user. To be identified as a special user, he/she must also provide, during the registration process, a voucher possibly received from the IT department.

Access is granted only if a user is registered and the password is correct: In all other cases access is denied. If the registered user is a special user and the password is wrong, a special warning is shown on the system console.

You are currently performing a quality risk analysis using FMEA.

Based only on the given information, which of the following is NOT a product risk that could be identified during the quality risk analysis?

- A.** The authentication system grants access to a normal user with a wrong password
- B.** The authentication system grants access to a special user with a wrong password
- C.** The authentication system denies access for a special user with a wrong password, but doesn't display a special warning on the system console
- D.** The late delivery of the authentication feature to the test team causes delays in the start of test execution and this could result in a shorter test period

Answer: D

NEW QUESTION: 2

Welches der folgenden BEST ermöglicht einen effektiven Eskalationsprozess innerhalb eines Incident-Response-Programms?

- A. Definierte Schwellenwerte für Vorfälle
- B. Spezielle Finanzierung für das Incident Management
- C. Überwachte Programmmetriken
- D. Angemessene Personalausstattung für die Reaktion auf Vorfälle

Answer: A

NEW QUESTION: 3

A company is using OSPF between its HQ location and a branch office. HQ is assigned area 0 and the branch office is assigned area 1. The company purchases a second branch office, but due to circuit delays to HQ, it decides to connect the new branch office to the existing branch office as a temporary measure. The new branch office is assigned area 2. Which OSPF configuration enables all three locations to exchange routes?

- A. The existing branch office must be configured as a stub area
- B. The new branch office must be configured as a stub area
- C. A sham link must be configured between the new branch office and HQ
- D. A virtual link must be configured between the new branch office and HQ

Answer: D
