NEW QUESTION: 1

Which information is required to configure ESRS for VPLEX?

- A. VPLEX model type Site ID IP address of the Management Server public port Primary Customer contact
- B. VPLEX model type Level Assembly customer contact IP address of the Management Server public port
- C. VPLEX model type Top Level Assembly Site ID IP address of the Management Server public port B/Top Level Assembly Site ID IP address of the Management Server public port Configuration (1, 2 or 4 Engines)

Answer: C

NEW QUESTION: 2

* When AdventureWorksValidationException exceptions are caught, log the information by using the static void Log (AdventureWorksValidationException ex) method.

* When AdventureWorksDbException or other AdventureWorksException exceptions are caught, log the information by using the static void Log (AdventureWorksException ex) method.

Answer:

Explanation:

Explanation

Go from the most specific exception to the least on.

So the order would be:

1. AdventureWorksValidationException - catch this ex
2. AdventureWorksException - catch AdventureWorksDbException and other AdventureWorksExceptions
3. Exception - catch all the rest

NEW QUESTION: 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are designing a storage solution to support on-premises resources and Azure-hosted resources.

You need to provide on-premises storage that has built-in replication to Azure.

Solution: You include Azure File Storage in the design.

Does the solution meet the goal?

A. Yes

B. No

Answer: A

Explanation:

Explanation

Like the other Azure storage services, File storage exposes a REST API for accessing data in a share.

On-premise applications can call the File storage REST API to access data in a file share.
