That is really considerate of SAP [Free AZ-900 Test Questions](#) SAP Certified Application Associate - SAP SuccessFactors Employee Central Core 1H/2021 exam study materials, Simulation for real test.

NEW QUESTION: 1

A project manager is in the process of developing the cost management plan on a new project, which is based on the approved project charter's information. This is an innovative project and the company has not delivered a similar project in the past.

What should the project manager do next?

- A. Define a draft budget with a contingency to cover unknowns.
- B. Develop the work breakdown structure (WBS)for bottom-up cost estimating.
- C. Ask the project team to find similar projects outside the company.
- D. Use the project charter's deliverables for analogous estimating.

Answer: C

NEW QUESTION: 2

Your client requires configurators with 400 configurable attributes that don't need to be selected in a specific order

and the client is concerned about page load time.

How would you utilize Configuration Flows to provide an optimal user experience?

- A. Use tabs to display attributes.
- B. Display attributes on one tab in groups.
- C. Display attributes using a multi-node config flow.
- D. Use CSS to hide irrelevant attributes during selection.

Answer: C

NEW QUESTION: 3

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

Elastic Load Balancing provides a special Amazon EC2 source security group that the user can use to ensure that back-end EC2 instances receive traffic only from Elastic Load Balancing. This feature needs two security groups: the source security group and a security group that defines the ingress rules for the back-end instances. To ensure that traffic only flows between the load balancer and the back-end instances, the user can add or modify a rule to the back-end security group which can limit the ingress traffic. Thus, it can come only from the source security group provided by Elastic load Balancing.
