If you are still anxious about getting a certificate, why not try our C\_TS413\_2020 study guide?

### NEW QUESTION: 1

A System Administrator wants to configure the Automated Service and Support Request feature.

Where can settings for this be configured.

- A. Command Line Interface only
- B. On Local Management Interface, only during initial appliance setup
- C. On Local Management Interface, only after initial appliance setup is complete
- D. On SiteProtector only

**Answer: C**

Explanation:

You can configure the IBM Security Network Protection appliance to automatically open a Service and Support Request in the IBM Customer Support system when serious errors occur. Use the Service and Support page to enable this feature.

You must use the local management interface to set up the automated Service and Support Request feature. This configuration is not currently supported in the SiteProtector System or the command line interface.

### **NEW QUESTION: 3**

How do UDP scans work?

**A.** By establishing a three-way handshake.

**B.** By sending SYN packets to see what ports are open.

**C.** UDP scans have to rely on ICMP "port unreachable" messages to determine whether a port is open.

When the scanner sends a UDP packet and the port is not open on the victim's system, that system will respond with an ICMP "port unreachable" message.

**D.** By sending ICMP "port unreachable" messages to the victim.

**Answer: C**
