NEW QUESTION: 1

You need to configure a station so that when a department manager makes calls to employees the manager's calls will ring even though the called station might have Sent All Calls activated. Although the manager's station can be designated as a VIP telephone, the manager must be able to selectively activate this feature.

Which feature addresses this need?

- A. Button activated Send All Calls override
- B. Button activated Executive Calling
- C. FAC or button activated Automatic Inclusion
- D. FAC or button activated Priority Calling

Answer: D

NEW QUESTION: 2

What is true about planning a project in OUM Manage?

- A. There is no distinction between executing and controlling the project and executing and controlling an iteration/phase.
- B. The project plan that is established in the Project Startup phase details each task through the end of the project.
- C. Manage tasks are not included in the project work plan.
- D. All tasks are executed to the same degree during the Project Execution and Control phase.

Answer: A

Explanation:

Note:

Iterative and Incremental

OUM recognizes the advantages of an iterative and incremental approach to development and deployment of information systems. Any of the tasks within OUM may be iterated. Whether or not to iterate, as well as the number of iterations, varies. Tasks may be iterated to increase quality of the work products to a desired level, to add sufficient level of detail, or to refine and expand the work products on the basis of user feedback

NEW QUESTION: 3

DRAG DROP

You have a SharePoint farm.

You need to configure Active Directory Federation Services (AD FS).

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Box 1: Configure AD FS with the web application as a relying party
Box 2: Configure SharePoint 2013 to trust AD FS as an identity provider
Box 3: Configure web applications to use claims-based authentication that use AD FS as the trusted identity provider
Phase 0: Install and configure an AD FS server (we can assume that this has already been done here).
Phase 1: Configure AD FS with the web application as a relying party
Phase 2: Configure SharePoint 2013 to trust AD FS as an identity provider
Phase 3: Configure web applications to use claims-based authentication and AD FS as the trusted identity provider
