Filter http rule

A. allowed traffic when url server is down

Answer: A

Explanation:

filter url http 0.0.0.0 0.0.0.0 0.0.0.0 0.0.0.0 allow

The allow option, at the end of the filter URL statement, indicates that users should be allowed external HTTP access in the event the security appliance cannot communicate with Websense. If omitted and the Websense server is unavailable, users lose all HTTP access to the Internet. The allow option causes the ASA to forward HTTP traffic without filtering when the primary filtering server is unavailable.
