<https://technet.microsoft.com/en-us/library/hh489604.aspx> Import Your GPOs You can import current settings from your GPOs and compare these to the Microsoft recommended best practices. Start with a GPO backup that you would commonly create in the Group Policy Management Console (GPMC). Take note of the folder to which the backup is saved. In SCM, select GPO Backup, browse to the GPO folder's Globally Unique Identifier (GUID) and select a name for the GPO when it's imported. SCM will preserve any ADM files and GP Preference files (those with non-security settings that SCM doesn't parse) you're storing with your GPO

backups. It saves them in a subfolder within the user's public folder. When you export the baseline as a GPO again, it also restores all the associated files.
