NEW QUESTION: 1

Which utility provides either a GUI or command line interface for monitoring the availability and performance of NonStop servers and the applications that run on them?

- A. ASAP
- B. OMF
- C. TPDC
- D. TPM/Insight

Answer: A

NEW QUESTION: 2

Characterizing an existing network requires gathering as much information about the network as possible. Which of these choices describes the preferred order for the information-gathering process?

- A. Traffic analysis, existing documentation and organizational input, site and network audits
- B. Site and network audits, traffic analysis, existing documentation and organizational input
- C. Existing documentation and organizational input, site and network audits, traffic analysis
- D. Site and network audits, existing documentation and organizational input, traffic analysis

Answer: C

Explanation:

Explanation/Reference:

Explanation:

This section describes the steps necessary to characterize the existing network infrastructure and all sites.

This process requires three steps:

Step 1. Gather existing documentation about the network, and query the organization to discover additional information. Organization input, a network audit, and traffic analysis provide the key information you need.

(Note that existing documentation may be inaccurate.) Step 2. Perform a network audit that adds detail to the description of the network. If possible, use traffic-analysis information to augment organizational input when you are describing the applications and protocols used in the network.

Step 3. Based on your network characterization, write a summary report that describes the health of the network. With this information, you can propose hardware and software upgrades to support the network requirements and the organizational requirements.

NEW QUESTION: 3

What does the get feedback button do?

There are 2 correct answers to this question.

Response:

- A. It allows rater to send an email request to one or more individuals at the same time.
- B. It allows the form to be sent to more than one individual at a time.
- C. It allows the rater to send the entire form to a user outside of the route map.
- D. It allows a user to rate and/or comment on the form.

Answer: C,D

NEW QUESTION: 4

Which three options are available when creating a security profile? (Choose three)

- A. Url Filtering
- B. Threat Prevention
- C. File Blocking
- D. Anti-Malware
- E. Antivirus
- F. IDS/ISP

Answer: A,C,E

Explanation:

Using the URL Category as match criteria allows you to customize security profiles (antivirus, anti-spyware, vulnerability, file-blocking, Data Filtering, and DoS) on a per-URL-category basis.
