Explanation:

You can delete your VPC at any time (for example, if you decide it's too small). However, you must terminate all instances in the VPC first. When you delete a VPC using the VPC console, Amazon deletes all its components, such as subnets, security groups, network ACLs, route

tables, Internet gateways, VPC peering connections, and DHCP options. If you have a VPN connection, you don't have to delete it or the other components related to the VPN (such as the customer gateway and virtual private gateway).
