NEW QUESTION: 1

Which of the following System Tools would be the BEST one to perform a regular archiving of information on a PC?

- A. Backup
- B. XCOPY
- C. System Restore
- D. ROBOCOPY

Answer: A

Explanation:

Reference:<http://windows.microsoft.com/en-us/windows7/products/features/backup-and-restore>

NEW QUESTION: 2

Your network contains an Active Directory domain named contoso.com. The domain has Microsoft System Center 2012 Configuration Manager deployed.

You use Configuration Manager to deploy Windows updates to client computers.

Your company has several line-of-business applications deployed. The application developer uses Windows Installer patches (.msp files) to provide the company with application updates.

You need to recommend a solution to integrate the deployment of the application updates into the current update infrastructure.

What should you include in the recommendation?

- A. Microsoft Security Compliance Manager
- B. Microsoft System Center Updates Publisher 2011
- C. Windows Assessment and Deployment Kit (Windows ADK)
- D. Microsoft Deployment Toolkit (MDT)

Answer: B

Explanation:

System Center Updates Publisher Updates Publisher 2011 is an application that can be used with System Center Configuration Manager to enable independent software vendors or line-of-business application developers and IT administrators to: Import software updates from

catalogs created by non-Microsoft organizations or created from within the administrator's organization
Create and modify software update definitions
Create applicability and deployment metadata for software updates
Export software update definitions to other Updates Publisher 2011 consoles
Publish software updates to a configured update server
By using Updates Publisher to define software updates and publish them to the update server, administrators you can begin detecting and deploying published software updates with System Center Configuration Manager to client and server computers in your organization. New in System Center Updates Publisher 2011 An improved user interface that allows better control of managing software updates. A new automatic publication type with which Updates Publisher 2011 can query Configuration Manager to determine whether the selected software update or software update bundle is published with full content or only metadata. A new Software Update Cleanup Wizard that you can use to expire software updates that exist on the update server, but are not in the Updates Publisher 2011 repository. The ability to create Software Update bundles. The ability to define prerequisite updates and superseded updates as part of a software update definition
Hyperlink

NEW QUESTION: 3

次の表に示す Azure 仮想マシンがあります。

DNS サービスは VM1 にインストールされます。

次の図に示すように、各仮想ネットワークの DNS サーバー設定を構成します。

VM1 の DNS サービスを使用して、すべての仮想マシンが DNS 名を解決できることを確認する必要があります。

あなたは何をするべきか？

- A. VNET1 にサービスエンドポイントを追加します。
- B. VNET2 および VNET3 にサービスエンドポイントを追加します。
- C. VNET1、VNET2、および VNET3 間のピアリングを構成します。
- D. VM1 で条件付きフォワーダーを構成する

Answer: D

Explanation:

NEW QUESTION: 4

Which statement about VTP bombing is true?

- A. It occurs because of configuration mismatch on VTPV3 switches. This problem can be avoided using a configuration management tool.
- B. It occurs when a client connects to a switch and launches a distributed denial of service attack against the VTP domain. This attack is possible only if the client knows the VTP password.
- C. It occurs when a server with a higher revision number and a wrong VTP database is inserted into the VTP domain. This situation may occur when a new switch is plugged into a stable VTP domain. The incorrect database is propagated to the domain and the earlier stable database is overwritten.
- D. It occurs when switches with different VTP versions are connected together. This situation may occur when a new switch is plugged into a stable VTP domain. The MAC address table of the new switch overrides the MAC address table of stable switches causing interruption of

service.

Answer: C
