NEW QUESTION: 4

P's age is twice Q's age. One year ago, R's age was exactly half of P's age at that time.

- A. The relationship cannot be determined from the information given.
- B. The quantity in Column A is greater;
- C. The quantity in Column B is greater;
- C. The quantities are equal;

Answer: C

Explanation:

You can approach this problem intuitively, without a written system of equations. If P's age were twice what R's age is now, then Q's age would equal R's age, and the correct answer would be choice (C). R's current age must be greater than half of P's (because one year ago R's age was exactly half of P's). Given that Q's age is exactly half of P's age, R must be older than Q.
