Set-TransportService Mailbox01 -DelayNotificationTimeout 1:00:00 DelayNotificationTimeout
The DelayNotificationTimeout parameter specifies how long the server waits before it generates a delayed delivery status notification (DSN) message. The default value is 4 hours. To specify a value, enter it as a time span: dd.hh:mm:ss where d = days, h = hours, m = minutes, and s = seconds. For example, to specify 3.5 hours for this parameter, use 03:30:00. The valid input range for this parameter is from 00:00:01 through 30.00:00:00. The value of the DelayNotificationTimeout parameter should always be greater than the value of the TransientFailureRetryCount parameter multiplied by the value of the TransientFailureRetryInterval parameter.
