As we know, if something has become the regular thing, we will be getting used to it, So our Marketing-Cloud-Email-Specialist practice materials are their masterpiece full of professional knowledge and sophistication to cope with the Marketing-Cloud-Email-Specialist exam.

### **NEW QUESTION: 1**

A company has deployed a NAT instance to allow web servers to obtain software updates from the internet. There latency on the NAT instance as the network grows. A SysOps Administrator needs to reduce latency on the instance in a manner that a efficient, cost effective, and allow for scaling with future demand.

Which action should be taken to accomplish this?

- A.** Convert the NAT instance to a larger instance size.
- B.** Add a second NAT instance and place both instance behind a load balancer.
- C.** Replace the NAT instance with NAT gateway.
- D.** Replace the NAT instance with a virtual private gateway.

**Answer: C**

Explanation:

<https://awscoach.net/nat-instance-vs-nat-gateway/>

### **NEW QUESTION: 2**

Which statement best describes a Media Termination Point?

- A.** A hardware Media Termination Point can be used to transcode a-law to mu-law and vice versa, but both connections must utilize the same packetization periods.
- B.** A Media Termination Point corrects a mismatch in DTMF transport types when using Delayed Offer for inbound SIP calls.
- C.** In Cisco Unified Communications Manager 6.0, a Media Termination Point is required when

two endpoints use a common method for sending DTMF between them such as for all calls using SIP trunks.

**D.** When using H.323 Fast Start, for inbound and outbound Fast Start, a Media Termination Point is required.

**E.** A Media Termination Point is an entity that accepts two full-duplex G.711 streams. It bridges the media streams together and allows them to be set up and torn down independently.

**Answer: E**

### **NEW QUESTION: 3**

A user has launched an EC2 instance store backed instance in the US-East-1a zone. The user created

AMI #1 and copied it to the Europe region. After that, the user made a few updates to the application

running in the US-East-1a zone. The user makes an AMI#2 after the changes. If the user launches a new

instance in Europe from the AMI #1 copy, which of the below mentioned statements is true?

**A.** The new instance will have the changes made after the AMI copy as AWS just copies the reference of

the original AMI during the copying. Thus, the copied AMI will have all the updated data

**B.** The new instance will have the changes made after the AMI copy since AWS keeps updating the AMI

**C.** It is not possible to copy the instance store backed AMI from one region to another

**D.** The new instance in the EU region will not have the changes made after the AMI copy

**Answer: D**

Explanation:

Within EC2, when the user copies an AMI, the new AMI is fully independent of the source AMI; there is no

link to the original (source) AMI. The user can modify the source AMI without affecting the new AMI and

vice a versa. Therefore, in this case even if the source AMI is modified, the copied AMI of the EU region

will not have the changes. Thus, after copy the user needs to copy the new source AMI to the destination

region to get those changes.
