NEW QUESTION: 1

Which four options are the characteristics of the original 802.11 protocol? (Choose four.)

- A. The protocol sets the maximum throughput at 1 Mb/s
- B. The most common deployment is three non-overlapping channels that are 20 MHz wide
- C. Designed to operate in the 2.4 GHz ISM frequency spectrum
- D. Designed to operate in the 5 GHz ISM frequency spectrum
- E. The most common deployment is three non-overlapping channels that are 22 MHz wide
- F. Defined DSSS and FHSS as possible methods for modulation
- G. The protocol sets the maximum throughput at 1 Mb/s or 2 Mb/s
- H. Defined FHSS and OFDM as possible methods for modulation

Answer: B,C,F,G

Explanation:

FHSS is still described in the original 802.11 protocol, but another technique was preferred and adopted by all 802.11 networks: Direct Sequence Spread Spectrum. Instead of small channels and a jumping sequence, the information is sent over a wider channel. This channel is 22 MHz wide (if the center frequency is 2.412, this channel spans from 2.401 GHz to 2.423 GHz) and does not move (no hopping, which is why the sequence is said to be direct instead of hopping). Then, over this 22 MHz channel, several bits of information are sent in parallel. If a source of interference affects part of the channel, it will prevent only the bits sent in that frequency from reaching the receiver.

NEW QUESTION: 2

Your customer wants to automatically allocate unassigned asset lines and common costs across multiple assets based on the construction-in-process cost of each asset. Identify the asset allocation method that you must use as the default method while configuring project types to meet this requirement. (Choose the best answer.)

- A. Current Cost
- B. Estimated Cost
- C. Actual Unit
- D. Standard Unit Cost

E. Spread Evenly

Answer: A

Explanation:

Explanation

Ref:<https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapfm/project-foundation-configuration-asset-cost-allocation-methods-explained> Topic -AssetCost Allocation Methods: Explained The asset cost allocation method determines how indirect or common costs incurred on a project are allocated to multiple assets.

You can specify an asset cost allocation method to enable Oracle Fusion Project Costing to automatically allocate unassigned asset lines and common costs across multiple assets. Unassigned asset lines typically occur when more than one asset is assigned to an asset grouping level.

Projects and project templates inherit a default asset cost allocation method from the associated project type.

You can override the default at the project level. If you use capital events to allocate costs, then you can also override the asset cost allocation method at the event level.

The following table describes the available asset cost allocation methods.

Method

Basis of Cost Allocation

Actual Units

Number of units defined for each asset

Current Cost

Construction-in-process (CIP) cost of each asset

Estimated Cost

Estimated cost of each asset

Standard Unit Cost

Combination of the standard unit cost and the number of units defined for each asset Spread

Evenly Equal allocation of cost to each asset

NEW QUESTION: 3

Which of the following statements are true regarding the project charter?

- A. The project charter includes resources and cost estimates and should be published under the name of project manager
- B. The project charter includes resources and cost estimates and should be published by a manager external to the project
- C. The project charter includes the project goals and objectives and should be published under the name of project sponsor
- D. None of the statements are true
- E. The project charter describes the business needs of the project and should be published under the name of project manager

Answer: B

NEW QUESTION: 4

모든 처리가 완료된 후 매일 은행에서 온라인 입금 파일 백업을 수행하고 7 일 동안 보관합니다. 매일의 거래 파일 사본은 유지되지 않습니다. 이 접근 방식은 다음과 같습니다.

- A. 체크 포인트 재시작 정보가 백업 파일과 함께 유지되지 않기 때문에 위험합니다.
- B. 1 주일 분량의 백업이 있으면 하나의 백업이 있어도 복구가 가능하다는 점에서 유효합니다. 읽을 수 없습니다.
- B : 가장 최근 백업 파일에서 복원하면 후속 백업이 생략 될 위험이 있습니다.

업무.

C 온라인 파일 인 경우 백업 / 복구 절차의 복잡성을 최소화한다는 점에서 유효합니다.
복원해야 합니다.

Answer: A

Explanation:

At appropriate intervals, the disk files should be copied on magnetic tape so that restart procedures can begin at those points if data are lost or destroyed. However, not retaining each day's transaction files is risky because information processed since the last backup file was created will be lost.
