NEW QUESTION: 3
RC4 is known to be a good stream generator. RC4 is used within the WEP standard on wireless LAN. WEP is known to be insecure even if we are using a stream cipher that is known to be secured.
What is the most likely cause behind this?
A. None of the above.
B. The IV range is too small.
C. All of the above.
D. There are some flaws in the implementation.
E. There is no key management.
Answer: C
Explanation:
Because RC4 is a stream cipher,the same traffic key must never be used
twice. The purpose of an IV,which is transmitted as plain text,is to prevent any
repetition,but a 24-bit IV is not long enough to ensure this on a busy network. The way the
IV was used also opened WEP to a related key attack. For a 24-bit IV,there is a 50%
probability the same IV will repeat after 5000 packets.
Many WEP systems require a key in hexadecimal format. Some users choose keys that
spell words in the limited 0-9,A-F hex character set,for example C0DE C0DE C0DE C0DE.
Such keys are often easily guessed.
