As for the safety issue of H14-211_V1.0 exam materials you are concerned about is completely unnecessary.

NEW QUESTION: 1

- A. Option D
- B. Option A
- C. Option C
- D. Option B

Answer: C

Explanation:

Google Cloud Platform (GCP) HTTP(S) load balancing provides global load balancing for HTTP(S) requests destined for your instances.

The HTTP(S) load balancer has native support for the WebSocket protocol.

Incorrect Answers:

A: HTTP server push, also known as HTTP streaming, is a client-server communication pattern that sends information from an HTTP server to a client asynchronously, without a client request.

A server push architecture is especially effective for highly interactive web or mobile applications, where one or more clients need to receive continuous information from the server.
