The answer is no.

NEW QUESTION: 1

Your customer wants to grant permissions to recruiters in CareerSite Builder (CSB) so they can ONLY edit pages. How will you set this up?

Please choose the correct answer

- A. Assign the recruiters the permission for all Locales in CSB.
- B. Create one role in CSB that includes permission for all page types, and assign '-' that role to each of the recruiters.
- C. Create a separate role in CSB for each of the page types, and assign all of these '-' roles to each of the recruiters.
- D. Assign the recruiters the permission "Is CSB Admin".

Answer: B

NEW QUESTION: 2

An organization's firewall technology needs replaced. A specific technology has been selected that is less costly than others and lacking in some important capabilities. The security officer has voiced concerns about sensitive data breaches but the decision is made to purchase. What does this selection indicate?

- A. A high risk tolerance environment
- B. A low vulnerability environment
- C. A high threat environment
- D. A low risk tolerance environment

Answer: A

NEW QUESTION: 3

You manage a System Center 2012 R2 deployment that contains the servers configured as shown in the following table.

You have a Microsoft Azure subscription. All three servers have the Azure PowerShell module installed.

You need to ensure that you can run Azure PowerShell cmdlets from Runbook Tester.

What should you do?

- A. On Server1, add the Run.NET Script activity. Add the Import-Module Azure cmdlet to the first

line of the script.

B. From Server2, deploy the integration pack for Representational State Transfer (REST) to Server1.

C. From Server2, deploy the Integration Pack for Windows Azure to Server1.

D. On Server1, add the Run.NET Script activity. Invoke

C:\Windows\System32\WindowsPowerShell\v1.0\PowerShell.exe in the first line of the script.

Answer: A

Explanation:

An Integration Module is a package that contains a Windows PowerShell Module and can be imported into Automation. Windows PowerShell Modules contain cmdlets that can be used in Automation runbooks. Products and services such as Operations Manager and Azure have modules that include cmdlets specific to their operation.
