A. 0
B. 1
C. 2
D. 3
E. 4
Answer: C

NEW QUESTION: 3

A. The quantity in Column A is greater;

B. The quantities are equal;
C. The relationship cannot be determined from the information given.
D. The quantity in Column B is greater;
Answer: C
Explanation:
Explanation/Reference:
Explanation:
triangles are the same shape, and their corresponding angles are equal in size (x=p and y=q), and therefore x-y=p-q. However, the quantity x-y is being compared here to q-p, notp-q. The two quantities are equal in size only if all four angles are equal (56°). It is not possible to determine whether all four angles are the same size, regardless of the measure of the third angle. Even though it appears from the figure that x-y is a negative number and q-p is a positive number, you can't assume that.
