NEW QUESTION: 3

How does AWS Data Pipeline execute activities on on-premise resources or AWS resources that you manage?

- A. By supplying a Task Runner json script that can be installed on your on-premise hosts

B. None of these

C. By supplying a Task Runner file that the resources can access for execution

D. By supplying a Task Runner package that can be installed on your on-premise hosts

Answer: D

Explanation:

Explanation/Reference:

Explanation:

To enable running activities using on-premise resources, AWS Data Pipeline does the following: It supply a Task Runner package that can be installed on your on-premise hosts. This package continuously polls the AWS Data Pipeline service for work to perform. When it's time to run a particular activity on your on- premise resources, it will issue the appropriate command to the Task Runner.
