#### **NEW QUESTION: 1**

Why would you include the rule shown in the attached screen shot in the Event Reason Rules data model? Please choose the correct answer.

- A. To prevent rules placed before this rule in the model from triggering
- B. To record an event reason for any change made to the employee's job information
- C. To record an event reason when adding a new employee
- D. To allow other rules placed after this rule in the model to trigger

**Answer: B**

#### **NEW QUESTION: 2**

Which of the following statements regarding BGP confederations is false?

- A. A BGP confederation divides an AS into several sub-ASs. ASs outside a confederation still consider the confederation as an AS.
- B. Sub-ASs within a BGP confederation can use private AS numbers. For Huawei NE and AR routers, a maximum of 32 sub-ASs can be configured in a BGP confederation.
- C. Confederations can easily detect routing loops inside an AS because EBGP is run between sub-ASs.
- D. By default, sub-AS numbers of a confederation are advertised to BGP peers outside the confederation.

**Answer: D**

#### **NEW QUESTION: 3**

Which exhibit shows the better Open Shortest Path First (OSPF) area scheme and for which reason?

- A. Exhibit 1 because the campus and data are separate areas
- B. Exhibit 2 because every area has fewer than 35 routers
- C. Exhibit 1 because every area has fewer than 50 routers
- D. Exhibit 1 because it allows the application of access control lists (ACLs) between users and the data center
- E. Exhibit 2 because every area has similar numbers of routers

**Answer: A**
