NEW QUESTION: 1

A. Option B
B. Option A
C. Option D
D. Option C
Answer: D

NEW QUESTION: 2
The SharePoint Farm administrator for a company installs Microsoft PPM and grants you administrative rights for PWA. The PWA instance is accessible at the URL: https://AppServer/Live.
You determine that the client needs to implement a Resource Breakdown Structure (RBS) to provide access to projects.
You need to ensure that the RBS is implemented.
What should you do first?
A. Run the Set-SPProjectPermissionMode Windows PowerShell cmdlet.
B. From Settings, select Manage Groups.
C. From Site Settings, activate the Project Web App Connectivity feature.
D. Ask the SharePoint administrator to run the Set-SPProjectPermissionMode Windows PowerShell cmdlet.
Answer: D

NEW QUESTION: 3
You need to define a custom domain name for Azure AD to support the planned infrastructure.
Which domain name should you use?

A. Install Azure AD Connect on a server in the Miami office and enable Pass-through Authentication

B. Allow inbound TCP port 8080 to the domain controllers in the Miami office.

C. Add http://autologon.microsoftazuread-sso.com to the intranet zone of each client computer in the Miami office.

D. Join the client computers in the Miami office to Azure AD.

E. Install the Active Directory Federation Services (AD FS) role on a domain controller in the Miami office.

Answer: A,C

Explanation:

Every Azure AD directory comes with an initial domain name in the form of domainname.onmicrosoft.com. The initial domain name cannot be changed or deleted, but you can add your corporate domain name to Azure AD as well. For example, your organization probably has other domain names used to do business and users who sign in using your corporate domain name. Adding custom domain names to Azure AD allows you to assign user names in the directory that are familiar to your users, such as '' instead of ' name.onmicrosoft.com'.

Scenario:

Network Infrastructure: Each office has a local data center that contains all the servers for that office. Each office has a dedicated connection to the Internet.

Humongous Insurance has a single-domain Active Directory forest named humongousinsurance.com

Planned Azure AD Infrastructure: The on-premises Active Directory domain will be synchronized to Azure AD.
