Answer: B

NEW QUESTION: 2

DRAG DROP

Your company has two offices. The offices are located in New York and San Francisco. You have an Exchange Server 2013 organization that contains two servers. The servers are configured as shown in the following table.

The organization contains four mailbox databases. The mailbox databases are configured as shown in the following table.

Recently, DB1 went offline because of a disk failure. The disk is restored and DB1 is mounted. You discover that there are more than 10,000 email messages queued for delivery to DB1.

You need to preserve the messages and perform the following actions:

- Export the messages queued for delivery to a different drive.
- Clear the messages queued for delivery.
- Ensure that the messages queued for delivery to DB1 are delivered while preserving the original message header information.
- Prevent duplicate messages.

Which four actions should you perform in sequence? (To answer, move the appropriate four

actions from the list of actions to the answer area and arrange them in the correct order.)

Answer:

Explanation:
