### NEW QUESTION: 3

A utility company sees several "New Connect" activities being dropped into the routing bucket during the day.

They want "Meter Read" activities to be removed from the technician's route so that the "New Connect" activities can be assigned if the technician qualifies for the activity.

They enabled reoptimization in their route plan and created a reoptimization filter targeting the "Meter Read" activities.

What additional settings are required in the route plan to meet the desired behavior?

**A.** Set the reoptimization goal to "Assign high priority activities". Then set cost of not assigning an activity for "Meter Read" on activities in existing routes to "Highest", whereas cost of not assigning an activity for "New Connect" in activities in the routing bucket to "Normal".

**B.** Set the reoptimization goal to "Reduce Overdue". Then set cost of not assigning an activity for "Meter Read" on activities in existing routes to "High", whereas cost of not assigning an activity for "New Connect" in activities in the routing bucket to "Normal".

**C.** Set the reoptimization goal to "Assign high priority activities". Then set cost of not assigning an activity for "Meter Read" on activities in existing routes to "Low", whereas cost of not assigning an activity for

"New Connect" in activities in the routing bucket to "High".

**D.** Set the reoptimization goal to "Assign high priority activities". Then set cost of not assigning an activity for "Meter Read" on activities in existing routes to "High", whereas cost of not assigning an activity for

"New Connect" in activities in the routing bucket to "Low".

**Answer: D**
