The best and most updated latest C-PO-7517 dumps exam training resources in PDF format download free try from Totherescue Download SAP Certified Technology Associate real C-PO-7517 dumps exam questions and verified answers.

NEW QUESTION: 1

Drag and drops the feature from the left onto the correct description on the right

Answer:

Explanation:

NEW QUESTION: 2

A. Option B

B. Option E

C. Option A

D. Option D

E. Option C

Answer: A,E

Explanation:

Explanation

A loopback interface never comes down even if the link is broken so it provides stability for the OSPF process (for example we use that loopback interface as the router-id) - The router-ID is chosen in the order below:

- + The highest IP address assigned to a loopback (logical) interface.
- + If a loopback interface is not defined, the highest IP address of all active router's physical interfaces will be chosen.
- > The loopback interface will be chosen as the router ID of RouterB -

NEW QUESTION: 3

An organization will be expanding its current network design. When fully built out, there will be 99 VPCs spread across 11 AWS accounts (9 VPCs per account). There is currently an AWS Direct Connect connection into one account with 9 VPCs, each with a virtual network interface (VIF) per VPC.

Which of the following designs will minimize cost while allowing the organization to expand?

A. Order 10 new Direct Connect connections, one from each of the accounts that will be provisioned.

Create private VIFs in each account. Attach one private VIF per VPC.

B. Create a transit VPC in the existing account that consists of two routers in separate Availability Zones.

Connect each VPC to the two routers in the transit VPC by using VPN.

C. Create a public VIF on the Direct Connect connection. Leverage the public VIF to create a VPN connection to each VPC.

D. Create hosted private VIFs in the existing account. Connect a private VIF to an AWS Direct Connect gateway in each account. Connect the gateway in each account to the VPCs.

Answer: B
