NEW QUESTION: 1

You are developing a C# application that has a requirement to validate some string input data by using the Regex class.

The application includes a method named ContainsHyperlink. The ContainsHyperlink() method will verify the presence of a URI and surrounding markup.

The following code segment defines the ContainsHyperlink() method. (Line numbers are included for reference only.)

The expression patterns used for each validation function are constant.

You need to ensure that the expression syntax is evaluated only once when the Regex object is initially instantiated.

Which code segment should you insert at line 04?

A. Option A

B. Option D

C. Option B

D. Option C

Answer: B

Explanation:

NEW QUESTION: 4

Which of these statements about BigQuery caching is true?

- A. Query results are cached even if you specify a destination table.
- B. There is no charge for a query that retrieves its results from cache.
- C. By default, a query's results are not cached.
- D. BigQuery caches query results for 48 hours.

Answer: B

Explanation:

When query results are retrieved from a cached results table, you are not charged for the query. BigQuery caches query results for 24 hours, not 48 hours. Query results are not cached if you specify a destination table. A query's results are always cached except under certain conditions, such as if you specify a destination table.
