We are offering excellent and valid Juniper JN0-1302 practice questions and exam simulation inside, Once you decide to buy JN0-1302 valid test questions, and finish the payment, we will at once send JN0-1302 vce training file the goods to you by email.

It offers professional skills, perfection utility and efficiency for beating Juniper Certification JN0-1302 APP files.

NEW QUESTION: 1
For what reason would you configure multiple security contexts on the ASA firewall?
A. To separate different departments and business units.
B. To provide redundancy and high availability within the organization.
C. To enable the use of multicast routing and QoS through the firewall.
D. To enable the use of VRFs on routers that are adjacently connected.
Answer: A
Explanation:
You can partition a single ASA into multiple virtual devices, known as security contexts. Each context is an independent device, with its own security policy, interfaces, and administrators. Multiple contexts are similar to having multiple standalone devices.
Common Uses for Security Contexts
+ You are a service provider and want to sell security services to many customers. By enabling multiple security contexts on the ASA, you can implement a cost-effective, space-saving solution that keeps all customer traffic separate and secure, and also eases configuration.
+ You are a large enterprise or a college campus and want to keep departments completely separate.
+ You are an enterprise that wants to provide distinct security policies to different departments.
+ You have any network that requires more than one ASA.
