We also provide you with three trial versions of our 1Z1-083 exam questions, The rich experience with relevant certificates is important for enterprises to open up a series of professional vacancies for your choices.

Most of the experts have been studying in the professional field for many years and have accumulated much experience in our 1Z1-083 practice questions, Accurate Oracle Database Administration II questions.

You will not squander time or money once you bought our 1Z1-083 certification training.

NEW QUESTION: 1

- A. Option C
- B. Option D
- C. Option A
- D. Option B

Answer: D

NEW QUESTION: 2

Assume you are managing the development of a construction project in your city to replace its five bridges so they are state of the art and meet updated safety standards since they originally were constructed 20 years ago. The design work has been completed, you have awarded subcontracts, and are set to begin construction. Today your legal department told you to stop work as you had not consulted them, and there was a critical standard you overlooked during the design process. This example shows _____

- A. You need to continually identify project stakeholders
- B. You need to continually work to engage stakeholders on your project
- C. You should provide the legal department with a copy of your stakeholder management plan and ask for their representative to sign it and offer any comments
- D. You should use a RACI chart and have one of your team members work with the legal department throughout the project

Answer: A

Explanation:

Stakeholder identification is a continual process throughout the project life cycle. The legal department often is overlooked, but it is a significant stakeholder, and in this situation, delays resulted. Significant expenses often are due to legal requirements that must be met before the project can be completed, or the project scope is delivered. NEW QUESTION: 3

- A. ESD mats
- B. Vacuums
- C. Privacy screens
- D. Air filters

Answer: D

NEW QUESTION: 4

Which two statements correctly define the use cases for Business Process Execution Language(BPEL) vs.

Business Process Modeling Notation (BPMN) vs. Enterprise Service Bus (ESB)?

- A.** An ESB is used primarily for stateless messages and service mediation. The ESB construct is being replaced by API's and API Gateways in modern Cloud architectures.
- B.** Decision Model and Notation (DMN) replaces BPMN in modern Cloud Architectures.
- C.** BPEL and ESB are both good technologies for doing heavy transformations of data before sending the data to a back-end system or database.
- D.** BPEL is inherently better than BPMN in managing orchestrations that involve people, because BPEL can also interact with systems.
- E.** All are part of a typical/traditional on-premise enterprise integration strategy and can also be an important part of a hybrid on-premises/Cloud architecture.

Answer: A,C
