NEW QUESTION: 1
The CPI on your project is 0.44, which means that you should_____
A. Recognize that your original estimates were fundamentally flawed, and your project is in an atypical situation
B. Place emphasis on improving the timeliness of the physical progress
C. Place emphasis on improving the productivity by which work was being performed
D. Reassess the life-cycle costs of your product, including the length of the life-cycle phase
Answer: A
Explanation:
Explanation/Reference:
Explanation:
CPI = EV/AC. It measures the efficiency of the physical progress accomplished compared to the baseline.
A CPI of 0.44 means that for every dollar spent, you are only receiving 44 cents of progress. Therefore, something is not correct with how you planned your project, or your original estimates were fundamentally flawed, and your project is in an atypical situation. You might want to reconsider a formal "replan" and/or take a new baseline of your project.

NEW QUESTION: 2
A weather service provides high-resolution weather maps from a web application hosted on AWS in the eu-west-1 Region. The weather maps are updated frequently and stored in Amazon S3 along with static HTML content. The web application is fronted by Amazon CloudFront.
