DRAG DROP

Your network contains an Active Directory domain named adatum.com. The domain contains three servers. The servers are configured as shown in the following table.

Server1 is configured as shown in the exhibit. (Click the Exhibit button.)

Template1 contains custom cryptography settings that are required by the corporate security team.

On Server2, an administrator successfully installs a certificate based on Template1.

The administrator reports that Template1 is not listed in the Certificate Enrollment wizard on Server3, even after

selecting the Show all templates check box.

You need to ensure that you can install a server authentication certificate on Server3. The certificate must comply

with the cryptography requirements.
