### **NEW QUESTION: 1**

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes a user named User1.

You enable multi-factor authentication for contoso.com and configure the following two fraud alert settings:

- \* Set Allow users to submit fraud alerts: On
- \* Automatically block users who report fraud: On

You need to instruct the users in your organization to use the fraud reporting features correctly. What should you tell the users to do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### **Answer:**

Explanation:

Explanation

Code to report fraud during initial greeting: When users receive a phone call to perform two-step verification, they normally press # to confirm their sign-in. To report fraud, the user enters a code before pressing #. This code is 0 by default, but you can customize it.

Block user when fraud is reported: If a user reports fraud, their account is blocked for 90 days or until an administrator unblocks their account. An administrator can review sign-ins by using the sign-in report, and take appropriate action to prevent future fraud. An administrator can then unblock the user's account.

**NEW QUESTION: 3**

- A. show ip flow top-talkers
- B. show mls netflow ip
- C. show mls sampling
- D. show ip flow export
- E. show ip cache flow

**Answer: E**

Explanation:

The following is an example of how to visualize the NetFlow data using the CLI. There are three methods to visualize the data depending on the version of Cisco IOS Software. The traditional show command for NetFlow is "show ip cache flow" also available are two forms of top talker commands. One of the top talkers commands uses a static configuration to view top talkers in the network and another command called dynamic top talkers allows real-time sorting and aggregation of NetFlow data. Also shown is a show MLS command to view the hardware cache on the Cisco Catalyst 6500 Series Switch. The following is the original NetFlow show command used for many years in Cisco IOS Software. Information provided includes packet size distribution; basic statistics about number of flows and export timer setting, a view of the protocol distribution statistics and the NetFlow cache. R3#show ip cache flow IP packet size distribution (469 total packets): 1-32 64 96 128 160 192 224 256 288 320 352 384 416 448 480 000 .968 .000 .031 .000 .000 .000 .000 .000 .000 .000 .000 .000 .000 .000 .000 512 544 576 1024 1536 2048 2560 3072 3584 4096 4608
