NEW QUESTION: 1

Instructions:

Enter IOS commands on the Dubai router to verify network operation and answer for multiple-choice

questions. THIS TASK DOES NOT REQUIRE DEVICE CONFIGURATION.

Click on the Console PC to gain access to the console of the router. No console or enable passwords

are required.

To access the multiple-choice questions, click of the numbered boxes on the left of the top panel.

If required, what password should be configured on the DeepSouth router in the branch office to allow a connection to be established with the MidEast router?

- A. Secret
- B. No password is required.
- C. Telnet
- D. Enable
- E. Console

Answer: D

Explanation:

Explanation/Reference:

Explanation:

In the diagram, DeepSouth is connected to Dubai's S1/2 interface and is configured as follows:

Interface Serial1/2

IP address 192.168.0.5 255.255.255.252

Encapsulation PPP; Encapsulation for this interface is PPP

Check out the following Cisco Link:

Here is a snip of an example:

Network Diagram

If Router 1 initiates a call to Router 2, Router 2 would challenge Router 1, but Router 1 would not challenge Router 2. This occurs because the ppp authentication chap calling command is configured on Router 1.

This is an example of a unidirectional authentication. In this setup, the ppp chap hostname alias-r1 command is configured on Router 1. Router 1 uses "alias-r1" as its hostname for CHAP authentication instead of "r1." The Router 2 dialer map name should match Router 1's ppp chap hostname; otherwise, two B channels are established, one for each direction.

technologies_configuration_example09186a0080094333.shtml#configuringausernamefromtheroutersname

NEW QUESTION: 2

A network administrator is troubleshooting the OSPF configuration of routers R1 and R2. The routers cannot establish an adjacency relationship on their common Ethernet link.

The graphic shows the output of the show ip ospf interface e0 command for routers R1 and R2. Based on the information in the graphic, what is the cause of this problem?

- A. The cost on R1 should be set higher.
- B. The hello and dead timers are not configured properly.
- C. The OSPF process ID numbers must match.
- D. The priority on R1 should be set higher.
- E. A backup designated router needs to be added to the network.
- F. The OSPF area is not configured properly.

Answer: B

Explanation:

In OSPF, the hello and dead intervals must match and here we can see the hello interval is set to 5 on R1 and 10 on R2. The dead interval is also set to 20 on R1 but it is 40 on R2.

NEW QUESTION: 3

CORRECT TEXT

What tool can be used to send kernel boot messages to a remote server?

Answer:

Explanation:

netconsole

Explanation:

See <http://www.kernel.org/doc/Documentation/networking/netconsole.txt>
