NEW QUESTION: 1

A company requires that all users enroll in the corporate PKI structure and digitally sign all emails. Which of the following are primary reasons to sign emails with digital certificates? (Choose two.)

- A. To establish data loss prevention
- B. To prevent SPAM
- C. To ensure integrity
- D. To protect confidentiality
- E. To establish non-repudiation
- F. To establish transport encryption

Answer: C,D

NEW QUESTION: 2

An administrator connects VoIP phones to the same switch as the network PCs and printers. Which of the following would provide the BEST logical separation of these three device types while still allowing traffic between them via ACL?

- A. Define three subnets, configure each device to use their own dedicated IP address range, and then connect the network to a router
- B. Install a firewall and connect it to the switch
- C. Install a firewall and connect it to a dedicated switch for each device type
- D. Create three VLANs on the switch connected to a router

Answer: D

Explanation:

A virtual local area network (VLAN) is a hardware-imposed network segmentation created by switches. VLANs are used for traffic management. Communications between ports within the same VLAN occur without hindrance, but communications between VLANs require a routing function.

Incorrect Answers:

B. Subnetting is a dividing process used on networks to divide larger groups of hosts into smaller collections.

C, D: Firewalls are used to protect one network from another, not separate it.

NEW QUESTION: 3

The older patient that you have been assigned to is having difficulty distinguishing between hot and cold

temperatures. Alteration of what gland activity would lead to this problem?

A. Parotid

B. Thymus

C. Sweat

D. Pineal

Answer: C

Explanation:

Alterations in the sweat gland would lead to the patient having trouble distinguishing between hot and cold temperatures. The skin is important in protection, sensory reception homeostasis

and temperature regulation. The parotid glands are important in the drainage of saliva.

Melatonin

biosynthesis occurs in the pineal gland, and immunological roles throughout the body are affected by the

thymus gland.
