There are numerous C_TPLM30_67 exam dumps for the candidates to select for their preparation the exams, some candidates may get confused by so many choice, Choosing our Tothescue's exam dumps, success is just around the corner.

NEW QUESTION: 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Exchange Online tenant that contains 2,000 mailboxes.

A partner company named Fabrikam, Inc. uses a third-party messaging solution. The outbound SMTP server for Fabrikam uses an IP address of 131.107.2.22.

You discover that several email messages from the fabrikam.com domain are erroneously marked as spam.

You need to ensure that all the email messages sent from the fabrikam.com domain are delivered successfully to the user mailboxes of your company.

Solution: You create a connection filter.

Does this meet the goal?

A. No

B. Yes

Answer: A

Explanation:

Explanation

You can allow the server IP address in the Connection Filter. This would achieve the objective of ensuring all email from Fabrikam.com is delivered. However, it would also allow any other company that uses the thirdparty email server to bypass the spam filter.

The fact that the question specifies that Fabrikam uses a "third-party messaging solution" suggests that the answer to this question should be No although technically it would work.

NEW QUESTION: 2

A manufacturing company recently recovered from an attack on its ICS devices. It has since reduced the attack surface by isolating the affected components. The company now wants to implement detection capabilities. It is considering a system that is based on machine learning. Which of the following features would BEST describe the driver to adopt such nascent technology over mainstream commercial IDSs?

- A. Classifies traffic based on logical protocols and messaging formats
- B. Identifies and triggers upon known bad signatures and behaviors
- C. Automatically reconfigures ICS devices based on observed behavior
- D. Trains on normal behavior and identifies deviations therefrom

Answer: D

NEW QUESTION: 3

Which is a purpose of a summary risk profile?

- A. Determine the residual risk exposure, assuming that planned mitigation actions are successful
- B. Explain the programme risk exposure in monetary terms
- C. Show the relationship between critical risks in a programme
- D. Highlight any low probability benefits that are being managed as opportunity risks

Answer: C
