For the reason, they are approved not only by a large [H35-210_V2.5](#) number of IT professionals who are busy in developing their careers but also by the industry experts.

NEW QUESTION: 1

Although the STP protocol can solve the loop problem, the slow convergence of the network topology affects the user communication quality.

RSTP has made many improvements to STP. Which of the following is not an improvement of RSTP to STP?

- A.** RSTP has deleted 3 kinds of port states and added 2 kinds of port roles.
- B.** The RSTP port state specification is based on whether the port forwards user traffic and learns the MAC address, reducing the original five port states to three.
- C.** If a port does not receive configuration BPDUs from the upstream device within 4 consecutive Hello Time durations, the device considers that negotiation with this neighbor fails.
- D.** The non-root switch running RSTP sends configuration BPDUs at the interval specified by the Hello Timer. This behavior is completely performed by each device.

Answer: C

NEW QUESTION: 2

You are pen testing a Windows system remotely via a raw netcat shell. You want to get a listing of all the local users in the administrators group, what command would you use?

- A.** Net account administrators
- B.** Net localuser administrators
- C.** Net localgroup administrators
- D.** Net user administrators

Answer: C

NEW QUESTION: 3

Which two options are workstation requirements for Cisco VSM 7.x? (Choose two.)

- A. Microsoft Windows 7 Enterprise (64-bit)
- B. Microsoft Internet Explorer 8 (64-bit)
- C. Microsoft DirectX 11.0 or higher
- D. Microsoft .NET Framework 4.0
- E. Microsoft Internet Explorer 8 (32-bit)

Answer: C,D

NEW QUESTION: 4

Click to expand each objective. To connect to the Azure portal, type <https://portal.azure.com> in the browser address bar.

When you are finished performing all the tasks, click the 'Next' button.

Note that you cannot return to the lab once you click the 'Next' button. Scoring occurs in the background while you complete the rest of the exam.

Overview

The following section of the exam is a lab. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

To start the lab

You may start the lab by clicking the Next button.

You need to add a deployment slot named staging to an Azure web app named

[\[email#160;protected\]](#)

The solution must meet the following requirements:

- When new code is deployed to staging, the code must be swapped automatically to the production slot.
- Azure-related costs must be minimized.

What should you do from the Azure portal?

Answer:

Explanation:

See explanation below.

Explanation

Step 1:

Locate and open the [\[email#160;protected\]](#) web app.

1. In the Azure portal, on the left navigation panel, click Azure Active Directory.

2. In the Azure Active Directory blade, click Enterprise applications.

Step 2:

Open your app's resource blade and Choose the Deployment slots option, then click Add Slot.

Step 3:

In the Add a slot blade, give the slot a name, and select whether to clone app configuration from another existing deployment slot. Click the check mark to continue.

The first time you add a slot, you only have two choices: clone configuration from the default slot in production or not at all.
