NEW QUESTION: 4

A company is using an AWS KMS customer master key (CMK) with imported key material. The company references the CMK by its alias in the Java application to encrypt data. The CMK must be rotated every 6 months.

What is the process to rotate the key?

- A. Import a copy of the existing key material into a new CMK as a backup, and set the rotation schedule for 6 months.
- B. Enable automatic key rotation for the CMK, and specify a period of 6 months.
- C. Delete the current key material, and import new material into the existing CMK.
- D. Create a new CMK with new imported material, and update the key alias to point to the new CMK.

Answer: D

Explanation:

When you import key material into a CMK, the CMK is permanently associated with that key material. You can reimport the same key material, but you cannot import different key material into that CMK. Also, you cannot enable automatic key rotation for a CMK with imported key material. However, you can manually rotate a CMK with imported key material.
