NEW QUESTION: 3

Sie haben einen Hyper-V-Host namens Server1, auf dem Windows Server 2012 R2 ausgeführt wird. Server1 hostet 40 virtuelle Maschinen, auf denen Windows Server 2008 R2 ausgeführt wird. Die virtuellen Maschinen stellen eine Verbindung zu einem privaten virtuellen Switch her. Sie haben eine Datei, die Sie auf alle virtuellen Maschinen kopieren möchten.

Sie müssen mithilfe des Cmdlets Copy-VmFile ermitteln, auf welche Server Sie Dateien kopieren können.

Welchen Befehl sollten Sie ausführen? Wählen Sie zum Beantworten die entsprechenden Optionen im Antwortbereich aus.

Answer:

Explanation:

Erläuterung

NEW QUESTION: 4

会社がAmazon

EC2でeコマースアプリケーションを実行しています。アプリケーションは、少なくとも10のインスタンスを必要とするステートレスWeb層と、アプリケーションの使用をサポートするために最大250のインスタンスで構成されています。アプリケーションは50のインスタンスを必要とします。80%の時間コストを最小限に抑えるために使用できますか？

A.

リザーブドインスタンスを購入して50のインスタンスをカバーするオンデマンドインスタンスとスポットインスタンスを使用して残りのインスタンスをカバーする

B.

オンデマンドインスタンスを購入して40インスタンスをカバーするスポットインスタンスを使用して残りのインスタンスをカバーする

C.

リザーブドインスタンスを購入して80のインスタンスをカバーするスポットインスタンスを使用して残りのインスタンスをカバーする

D. リザーブドインスタンスを購入して250インスタンスをカバー

Answer: A

Explanation:

Reserved Instances

Having 50 EC2 RIs provide a discounted hourly rate and an optional capacity reservation for EC2 instances. AWS Billing automatically applies your RI's discounted rate when attributes of EC2 instance usage match attributes of an active RI.

If an Availability Zone is specified, EC2 reserves capacity matching the attributes of the RI. The capacity reservation of an RI is automatically utilized by running instances matching these attributes.

You can also choose to forego the capacity reservation and purchase an RI that is scoped to a region. RIs that are scoped to a region automatically apply the RI's discount to instance usage across AZs and instance sizes in a region, making it easier for you to take advantage of the RI's discounted rate.

On-Demand Instance

On-Demand instances let you pay for compute capacity by the hour or second (minimum of 60 seconds) with no long-term commitments. This frees you from the costs and complexities of planning, purchasing, and maintaining hardware and transforms what are commonly large fixed costs into much smaller variable costs.

The pricing below includes the cost to run private and public AMIs on the specified operating system ("Windows Usage" prices apply to Windows Server 2003 R2, 2008, 2008 R2, 2012, 2012 R2, 2016, and 2019). Amazon also provides you with additional instances for Amazon EC2 running Microsoft Windows with SQL Server, Amazon EC2 running SUSE Linux Enterprise Server, Amazon EC2 running Red Hat Enterprise Linux and Amazon EC2 running IBM that are

priced differently.

Spot Instances

A Spot Instance is an unused EC2 instance that is available for less than the On-Demand price. Because Spot Instances enable you to request unused EC2 instances at steep discounts, you can lower your Amazon EC2 costs significantly. The hourly price for a Spot Instance is called a Spot price. The Spot price of each instance type in each Availability Zone is set by Amazon EC2, and adjusted gradually based on the long-term supply of and demand for Spot Instances. Your Spot Instance runs whenever capacity is available and the maximum price per hour for your request exceeds the Spot price.
