NEW QUESTION: 1

Which of the following technologies can store multi-tenant data with different security requirements?

- A. Cloud computing
- B. Trusted platform module
- C. Hard drive encryption
- D. Data loss prevention

Answer: A

Explanation:

One of the ways cloud computing is able to obtain cost efficiencies is by putting data from various clients on the same machines. This "multitenant" nature means that workloads from different clients can be on the same system, and a flaw in implementation could compromise security.

Incorrect Answers:

A, B, C: None of these options offer multitenancy.
