### **NEW QUESTION: 2**

Which statement is true regarding chat rooms in Genesys Cloud?

- A. There is a maximum of 50 users to a room.
- B. You must have the room\_user permission to use rooms.
- C. Notifications can be turned off per room.
- D. Administrators assign people to rooms.

**Answer: C**

### **NEW QUESTION: 3**

Which of the following offers advantages such as the ability to use stronger passwords, easier password administration, one set of credential, and faster resource access?

- A. Smart cards
- B. Public Key Infrastructure (PKI)
- C. Single Sign-On (SSO)
- D. Symmetric Ciphers

**Answer: C**

Explanation:

Explanation/Reference:

Explanation:

Single Sign-On (SSO) allows a user to enter credentials once to gain access to all resources in primary and secondary network domains. Thereby, minimizing the amount of time users spend authenticating to resources and enabling the administrator to streamline user accounts and better control access rights.

Furthermore, security is improved by reducing the likelihood that users will record passwords and also lessens the administrator's time spent on adding and removing user accounts and modifying access permissions. Because SSO requires a user to remember only one password, a but one of the goals is that if a user only has to remember one password, a more complicated and secure password policy can be enforced.

Incorrect Answers:

A: Smart cards are used for authentication purposes in access control. Although it can provide extra protection in an SSO environment, it does not provide the ability to use stronger passwords, easier password administration, one set of credential, and faster resource access.

C: Symmetric Ciphers are used for encryption and decryption. It does not provide the ability to use stronger passwords, easier password administration, one set of credential, and faster resource access.

D: Public Key Infrastructure allows for people who are widely dispersed to communicate securely and predictably.
