Fourthly, we have excellent staff with world-class service, if you purchase our SCMA-CD exam dumps, you can enjoy our full-service, It is quite encouraging, It simulates [Test 4A0-C02 Cram Review](#) the real test with intelligent function, which can improve your reviewing efficiency.

Our product boosts many advantages and to gain a better understanding of our SCMA-CD study materials please read the introduction of the features and the functions of our product as follow.

About SCMA-CD exam, Totherescue has a great sound quality, will be the most trusted sources, If you try to purchase our products, you will find that SCMA SCMA-CD test guide materials are not the useless preparation materials.

Customers can download the demon freely, experience our accurate SCMA-CD Dumps collection, and then decide to buy it or not, We will accompany you at every stage of your exam!

All these three versions of Cardiology exam study materials show the same materials with different types, The exam comes with the features, which enables you to pass SCMA-CD exam with good grades.

2021 SCMA-CD Reliable Exam Pdf | Accurate Cardiology 100% Free Latest Test Materials

Designed in APP format, SCMA SCMA-CD Exam Training is the best alternative to your time and money to secure an enviable career in the world of IT as SCMA-CD Cardiology certified

professional.

And our pass rate of the SCMA-CD training engine is high as 98% to 100%, it is the data that proved and tested by our loyal customers, You don't have to worry about your personal info will leak out.

All related updates of the SCMA-CD learning guide will be sent to your mailbox, Higher social status, First of all, there are easy to understand and read lessons which will ensure excellent practice.

Why SCMA Other Certification is Important, You [SCMA-CD](#) can prepare yourself well before you find your true aim.

NEW QUESTION: 1

Your company has a main office and a Microsoft 365 subscription.

You need to enforce Microsoft Azure Multi-Factor Authentication (MFA) by using conditional access for all users who are NOT physically present in the office.

What should you include in the configuration?

- A. a user risk policy
- B. a named location in Azure Active Directory (Azure AD)
- C. a sign-in risk policy
- D. an Azure MFA Server

Answer: B

Explanation:

Explanation/Reference:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition>
n Testlet 1 Overview Fabrikam, Inc. is manufacturing company that sells products through partner retail stores. Fabrikam has 5,000 employees located in offices throughout Europe.

Existing Environment

Network Infrastructure

The network contains an Active Directory forest named fabrikam.com. Fabrikam has a hybrid Microsoft Azure Active Directory (Azure AD) environment.

The company maintains some on-premises servers for specific applications, but most end-user applications are provided by a Microsoft 365 E5 subscription.

Problem Statements

Fabrikam identifies the following issues:

Since last Friday, the IT team has been receiving automated email messages that contain "Unhealthy

Identity Synchronization Notification" in the subject line.

Several users recently opened email attachments that contained malware. The process to remove the

malware was time consuming.

Requirements

Planned Changes

Fabrikam plans to implement the following changes:

Fabrikam plans to monitor and investigate suspicious sign-ins to Active Directory

Fabrikam plans to provide partners with access to some of the data stored in Microsoft 365

Application Administration

Fabrikam identifies the following application requirements for managing workload applications:

User administrators will work from different countries

User administrators will use the Azure Active Directory admin center

Two new administrators named Admin1 and Admin2 will be responsible for managing Microsoft

Exchange Online only

Security Requirements

Fabrikam identifies the following security requirements:

Access to the Azure Active Directory admin center by the user administrators must be reviewed every

seven days. If an administrator fails to respond to an access request within three days, access must be removed. Users who manage Microsoft 365 workloads must only be allowed to perform administrative tasks for

up to three hours at a time. Global administrators must be exempt from this requirement. Users must be prevented from inviting external users to view company data. Only global administrators

and a user named User1 must be able to send invitations.

Azure Advanced Threat Protection (ATP) must capture security group modifications for sensitive

groups, such as Domain Admins in Active Directory.

Workload administrators must use multi-factor authentication (MFA) when signing in from an

anonymous or an unfamiliar location.

The location of the user administrators must be audited when the administrators authenticate to Azure.

AD

Email messages that include attachments containing malware must be delivered without the

attachment.

The principle of least privilege must be used whenever possible.

Testlet 2

Overview

Litware, Inc. is a financial company that has 1,000 users in its main office in Chicago and 100 users in a branch office in San Francisco.

Existing Environment

Internal Network Infrastructure

The network contains a single domain forest. The forest functional level is Windows Server 2016.

Users are subject to sign-in hour restrictions as defined in Active Directory.

The network has the IP address range shown in the following table.

The offices connect by using Multiprotocol Label Switching (MPLS).

The following operating systems are used on the network:
Windows Server 2016

Windows 10 Enterprise

Windows 8.1 Enterprise

The internal network contains the systems shown in the following table.

Litware uses a third-party email system.

Cloud Infrastructure

Litware recently purchased Microsoft 365 subscription licenses for all users.

Microsoft Azure Active Directory (Azure AD) Connect is installed and uses the default authentication settings. User accounts are not yet synced to Azure AD.

You have the Microsoft 365 users and groups shown in the following table.

Planned Changes

Litware plans to implement the following changes:

Migrate the email system to Microsoft Exchange Online

Implement Azure AD Privileged Identity Management

Security Requirements

Litware identifies the following security requirements:

Create a group named Group2 that will include all the Azure AD user accounts. Group2 will be used to

provide limited access to Windows Analytics

Create a group named Group3 that will be used to apply Azure Information Protection policies to pilot

users. Group3 must only contain user accounts

Use Azure Advanced Threat Protection (ATP) to detect any security threats that target the forest

Prevent users locked out of Active Directory from signing in to Azure AD and Active Directory

Implement a permanent eligible assignment of the Compliance administrator role for User1

Integrate Windows Defender and Windows Defender ATP on domain-joined servers

Prevent access to Azure resources for the guest user accounts by default

Ensure that all domain-joined computers are registered to Azure AD

Multi-factor authentication (MFA) Requirements

Security features of Microsoft Office 365 and Azure will be tested by using pilot Azure user accounts.

You identify the following requirements for testing MFA.

Pilot users must use MFA unless they are signing in from the internal network of the Chicago office.

MFA must NOT be used on the Chicago office internal network.

If an authentication attempt is suspicious, MFA must be used, regardless of the user location

Any disruption of legitimate authentication attempts must be minimized

General Requirements

Litware want to minimize the deployment of additional servers and services in the Active Directory forest.

NEW QUESTION: 2

Sie müssen eine Funktions-App mit dem Namen corp7509086nl erstellen, die Sticky-Sessions unterstützt. Die Lösung muss die mit Azure verbundenen Kosten des App Service-Plans minimieren.

Was sollten Sie über das Azure-Portal tun?

Answer:

Explanation:

Siehe nachstehende Erklärung.

Erläuterung

Schritt 1:

Wählen Sie die Schaltfläche Neu in der oberen linken Ecke des Azure-Portals aus und wählen Sie dann Berechnen > Funktionsanwendung aus.

Schritt 2:

Verwenden Sie die Funktions-App-Einstellungen wie unten aufgeführt.

App-Name: corp7509086n1

Hosting-Plan: Azure App Service-Plan

(brauche das für die Sticky Sessions)

Preisstufe des App Service-Plans: Shared Compute: Kostenlos

Schritt 3:

Wählen Sie Erstellen, um die Funktions-App bereitzustellen und bereitzustellen.
