Reliable Test Cost

Your Success In ADM-201 Destination Made Easy, Sometimes we may feel tired after work we would rather play games than learn a boring ADM-201 book, The ADM-201 Salesforce Certified Administrator Exam PDF file carries all the exam questions, answers, and Faqs.

We are committed to your achievements, so [VMCE2021 Valid Test Cost](#) make sure you try preparation exam at a time to win, You will find that we devote all our heart and soul to compiling exam materials and all practice materials of ADM-201 exam simulation are the best.

So you won't be pestered with the difficulties of the exam any more, By familiarizing **ADM-201 Reliable Test Cost** ourselves with the objective domain of each exam, we can determine which test to train for in order to best cover our career path.

NEW QUESTION: 1

Your network contains an Active Directory forest named contoso.local.

You purchase a Microsoft 365 subscription.

You plan to move to Microsoft and to implement a hybrid deployment solution for the next 12 months.

You need to prepare for the planned move to Microsoft 365.

What is the best action to perform before you implement directory synchronization? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Rename the Active Directory forest.
- B. Purchase a custom domain name.
- C. Create an external forest trust.
- D. Purchase a third-party X.509 certificate.

Answer: B

Explanation:

Explanation

The first thing you need to do before you implement directory synchronization is to purchase a custom domain name. This could be the domain name that you use in your on-premise Active Directory if it's a routable domain name, for example, contoso.com.

If you use a non-routable domain name in your Active Directory, for example contoso.local, you'll need to add the routable domain name as a UPN suffix in Active Directory.

<https://docs.microsoft.com/en-us/office365/enterprise/set-up-directory-synchronization>

NEW QUESTION: 2

A user is having issues with connectivity to an HTTPS virtual server. The virtual server is on the LTM device's external vlan, and the pools associated with the virtual server are on the internal vlan. An LTM Specialist does a tcpdump on the external interface and notices that the host header is incomplete.

In which location should the LTM Specialist put a traffic analyzer to gather the most pertinent data?

- A. external VLAN
- B. internal VLAN
- C. client machine
- D. server

Answer: C

NEW QUESTION: 3

A user has launched an EC2 instance. However, due to some reason the instance was terminated. If the user wants to find out the reason for termination, where can he find the details?

- A. The user can get information from the AWS console, by checking the Instance description under the State transition reason label
- B. The user can get information from the AWS console, by checking the Instance description under the Instance Status Change reason label
- C. The user can get information from the AWS console, by checking the Instance description under the Instance Termination reason label
- D. It is not possible to find the details after the instance is terminated

Answer: A

Explanation:

Explanation/Reference:

Explanation:

An EC2 instance, once terminated, may be available in the AWS console for a while after termination. The user can find the details about the termination from the description tab under the label State transition reason. If the instance is still running, there will be no reason listed. If the user has explicitly stopped or terminated the instance, the reason will be "User initiated shutdown".

https://docs.aws.amazon.com/AWSEC2/latest/UserGuide/Using_InstanceStraightToTerminated.html

NEW QUESTION: 4

You have two Hyper-V hosts named Server1 and Server2 that run Windows Server 2016. Server1 and Server2 are connected to the same network.

On Server1 and Server2, you create an external network switch named Switch1.

You have the virtual machines shown in the following table.

All three virtual machines are connected to Switch1.

You need to prevent applications in VM3 from being able to capture network traffic from VM1 or VM2. The solution must ensure that VM1 retains network connectivity.

What should you do?

- A. Configure network virtualization for VM1 and VM2.
- B. On Server2, create an external switch and connect VM3 to the switch.
- C. Modify the subnet mask of VM1 and VM2.
- D. On Server2, configure the VLAN ID setting of Switch1.

Answer: A
