NEW QUESTION: 1

Your company has recently installed a Cisco Unified CallManager cluster and a Cisco Unity voice mail platform. You have received complaints from users that the red MWI light never comes on, even when there are new voice-mail messages in the voice mailboxes. Which two steps must be taken to resolve this issue? (Choose two.)

- A.** Verify, using the Port Usage tool, that the ports dedicated to MWI on/off are not overutilized. Add another dedicated port if the current port is over-utilized.
- B.** Verify that the calls are being sent to the correct ports on the Cisco Unity server. If they are being sent to the incorrect ones by the Cisco Unified CallManager cluster, correct the values in the cluster.
- C.** Verify that the MWI on/off numbers are unique within the Cisco Unified CallManager cluster dial plan. If they are not, change the MWI on/off numbers in the Cisco Unified CallManager cluster so they are unique and configure the Cisco Unity server so they match.
- D.** Ensure that the number of ports licensed for the Cisco Unity server is greater than or equal to the number of configured ports.
- E.** Verify that the same numbers are being used for MWI on/off in both the Cisco Unified CallManager cluster and Cisco Unity server. If they are different, change the Cisco Unity server to match the Cisco Unified CallManager cluster.

Answer: C,E

NEW QUESTION: 2

What are the scenarios or industries that are suitable for using Python? (Multiple Choice)

- A.** Artificial intelligence
- B.** Game development
- D.** Hardware development
- C.** web development

Answer: A,B,C

NEW QUESTION: 3

Which of the following descriptions are correct about the buffer overflow attack? (Multiple Choice)

- A.** Buffer overflow attack is the use of software system for memory operation defects, running attack code with high operation authority

- B. Buffer overflow attacks are not related to operating system vulnerabilities and architectures
- C. Buffer overflow attacks are the most common method of attacking software systems
- D. Buffer overflow attack belongs to application layer attack behavior

Answer: A,C,D

NEW QUESTION: 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory forest named contoso.com.

You need to identify which server is the schema master.

Solution: You open Active Directory Users and Computers, right-click contoso.com in the console tree, and then click Operations Master.

Does this meet the goal?

A. Yes

B. No

Answer: A

Explanation:

You need to use the Schema snap-in to find the schema master. The Schema snap-in is not installed by default but can be installed by using Schmmgmt.dll.
