Note: This question is part of a series of questions that present the same scenario. Each question in this series contains a unique solution. Determine whether the solution meets the stated goals.

Your company has employees in different regions around the world.

You need to create a database table that stores the following employee attendance information:

- Employee ID
- date and time employee checked in to work
- date and time employee checked out of work

Date and time information must be time zone aware and must not store fractional seconds.

Solution: You run the following Transact-SQL statement:

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

datetime2 defines a date that is combined with a time of day that is based on 24-hour clock. datetime2 can be considered as an extension of the existing datetime type that has a larger date range, a larger default fractional precision, and optional user-specified precision.

Split tunneling is a computer networking concept which allows a mobile user to access dissimilar security

domains like a public network (e.g., the Internet) and a local LAN or WAN at the same time, using the same

or different network connections. This connection state is usually facilitated through the simultaneous use of, a

Local Area Network (LAN) Network Interface Card (NIC), radio NIC, Wireless Local Area Network (WLAN) NIC, and VPN client software application without the benefit of access control.
