Our CHISP training materials will never let you down for its wonderful quality, Related Exams, TRY our DEMO before you BUY, We can provide not only the trustable and valid CHISP exam torrent but also the most flexible study methods.

NEW QUESTION: 1

次の表に示すサブネットを含むVNET1という名前の仮想ネットワークがあります。

次の表に示すネットワーク構成を持つ2つのAzure仮想マシンがあります。

NSG1の場合、次の表に示すインバウンドセキュリティルールを作成します。

NSG2の場合、次の表に示すインバウンドセキュリティルールを作成します。

次の各ステートメントについて、ステートメントがtrueの場合は[はい]を選択します。それ以外の場合は、[いいえ]を選択します。

注：それぞれの正しい選択は1ポイントの価値があります。

Answer:

Explanation:

Box 1: Yes

The inbound security rule for NSG1 allows TCP port 1433 from 10.10.2.0/24 (or Subnet2 where VM2 and VM3 are located) to 10.10.1.0/24 (or Subnet1 where VM1 is located) while the inbound security rule for NSG2 blocks TCP port 1433 from 10.10.2.5 (or VM2) to 10.10.1.5 (or VM1). However, the NSG1 rule has a higher priority (or lower value) than the NSG2 rule.

Box 2: Yes

No rule explicitly blocks communication from VM1. The default rules, which allow communication, are thus applied.

Box 3: Yes

No rule explicitly blocks communication between VM2 and VM3 which are both on Subnet2. The default rules, which allow communication, are thus applied.

NEW QUESTION: 2

What is the primary function of the Informix Connection Manager?

A. To monitor and maintain the connections between nodes in an Enterprise Replication environment.

B. To monitor and govern SQL statements submitted by client applications.

C. To monitor and report the connection status of the High Availability Data Replication (HDR) secondary server.

D. To monitor and direct the connection requests from client applications to the appropriate server in the high availability cluster.

Answer: D

NEW QUESTION: 3

In the case of a major outage or business interruption, the security office has documented the expected loss of earnings, potential fines and potential consequence to customer service. Which of the following would include the MOST detail on these objectives?

- A.** Continuity of Operations
- B.** IT Contingency Plan
- C.** Business Impact Analysis
- D.** Disaster Recovery Plan

Answer: C

Explanation:

Explanation/Reference:

Explanation:

Business impact analysis (BIA) is the process of evaluating all of the critical systems in an organization to define impact and recovery plans. BIA isn't concerned with external threats or vulnerabilities; the analysis focuses on the impact a loss would have on the organization. A BIA comprises the following: identifying critical functions, prioritizing critical business functions, calculating a timeframe for critical systems loss, and estimating the tangible impact on the organization.

NEW QUESTION: 4
